

Particle Counter Calibration

Your APC & FCM calibration solution

A key step in a particle counting programme is the instrument calibration and its traceability to National Certified Reference Materials.

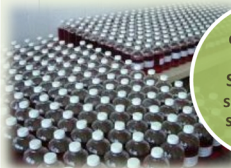

IFTS calibration suspensions were designed

GET THE MOST ACCURATE CALIBRATION WITH SCS400

In order to remain reliable, your **Automatic Particle Counters** and **Fluid Contamination Monitors** must be **regularly calibrated**.

APCs must be calibrated as per ISO 11171 or ISO 11943 and FCMs as per ISO 21018.

ACCURATE CALIBRATION ENSURES BETTER COMPARABILITY OF RESULTS AND STRONGLY CONTRIBUTES TO PRODUCT QUALITY AND PROCESS RELIABILITY

Primary calibration with SRM 2806b suspensions supplied by NIST*

Secondary calibration with SCS400 suspensions supplied by IFTS*

THE MOST RELIABLE AND ACCURATE CALIBRATION FOR YOUR EQUIPMENT

**Both manufactured by IFTS*

WHY SCS400 BY IFTS IS BEST FOR YOU?

As the **manufacturer of NIST SRM 2806b**, IFTS provides secondary calibration suspensions of the highest quality. SCS400 suspensions are **manufactured with the same equipment and checked according to the same requirements as SRM 2806b**.

Shipping conditions:

Supplied with individual particle size distribution certificate.

Can be delivered by batches of 10 to 300 bottles at a time.

Delivery time: 2 weeks, excluding shipment

Unit cost: \$275 per bottle

IFTS, Inc. Headquarters:
200 Pond Avenue
Middlesex, NJ 08846 USA
